Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a nucleic acid that is response to a Nic gene product, plant cells comprising the nucleic acid, a method of using it to making transformed tobacco plants, and tobacco plants and plant parts so produced, classified in class 800, subclass 298.
- II. Claims 33-55, drawn to a method of making a plant with an altered content of a protein of interest that is regulated by a cis-acting element by transformation with a nucleic acid comprising the cis-acting element and plants thereby produced, classified in class 800, subclass 278.
- III. Claims 56-64, drawn to a method of decreasing the expression of a protein of interest in a host cell wherein transcription of said protein of interest is enhanced by a cis-acting activating element that binds an activator, wherein the method comprises introducing into the host cell a decoy nucleic acid comprising the cis-acting activating element, classified in class 435, subclass 252.3.
- IV. Claims 65-73, drawn to a method of increasing the expression of a protein of interest in a host cell wherein transcription of said protein of interest is enhanced by a cis-acting repressor element that binds a repressor, wherein the method comprises introducing into the host cell a decoy nucleic acid comprising a cis-acting activating element, classified in class 435, subclass 440.

The inventions are distinct, each from the other because of the following reasons:

The methods of groups I-IV are independent and distinct inventions. The different methods have different starting materials, different method steps and different end products. For example, the nucleic acid used to make transformed plants in Group I is not used in any of the methods of groups II-IV.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, fields of search, and classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
